

Numstep: Torus

a puzzle by Ben Cornish

2026-09-12

HOW TO PLAY

Start at the coloured clue and follow the numbered chain in order.
Move horizontally or vertically to an adjacent square. Diagonal moves are not allowed. Black squares are blocked, and you cannot use a square more than once.
The highest-numbered clue completes the chain and may be the terminal square.
The grid wraps around both directions: the left edge is adjacent to the right edge, and the top edge is adjacent to the bottom edge.
